FISTF The world Federation

We are working within FISTF Board in all directions. Development, marketing, promotion and education.

Vital are industrial partners to bring the product (game) into the shops. Internet sales is not enough = fact.

We know that an Industrial partner will take us (FISTF) only serious if we are a stable and are a competent partner.

This means that the "associations" need to be educated, build logical game and sports structures and organisation according to FISTF Statutes, handbook, guides and our FISTF Pyramid (education).

The basement (clubs) shall work tight and well (best possible) and are the most important organisation group inside a sports organisation.
Conclusion: Unless the logical structures are not set, we will fail to sign a partnership contract...
.../ -->

...with a big industrial partner (sponsor). The pyramid must work (function).

Players need to feel save and cosy within member structures. We know well, not everyone wants to be a member. !! clear !!

What we wish (need), is that we FISTF and all its associations function perfectly human possible. Does that happen, we can move on well in piece and friendship and with the game we love. FISTF and WASPA shall cooperate deep together.

The FISTF Board members are all humans and are not the enemy of any single player, nor the enemy of WASPA.

That needs to be understood, and we will work & fight for that, until we all reach this level of understanding with respect and dignity. It can be so easy and simple in our little world of plastic figures.
